

## Call for Papers

# Medical Times

Medical Times, a peer-reviewed journal, is dedicated to publishing cutting-edge research in reproductive medicine.

We extend a special invitation to you, esteemed researchers, scholars, and professionals, to contribute to our upcoming issues. We welcome your original research articles, systematic reviews, case reports, and perspectives that will undoubtedly advance reproductive health and fertility knowledge.

*Medical Times encourages young researchers to appear in the scientific arena and offers the opportunity to publish report abstracts in a particular conference section.*

The journal's website uses the OJS system (Open Journal System) and all articles are individually assigned a DOI (Digital Object Identifier).

### **Themes of Interest:**

Assisted Reproductive Technologies (ART), Female and Male Infertility, Reproductive Endocrinology, Reproductive Genetics, Fertility Preservation, Reproductive Surgery, Reproductive Ethics and Law Reproductive Health Policy, Innovations in Reproductive Medicine.

### **Submission Guidelines:**

All submissions must adhere to the AMA formatting and citation style guidelines. Submitted manuscripts should NOT have been published elsewhere or be under consideration for publication elsewhere. *Authors are encouraged to review the author's instructions and formatting requirements carefully.*

### **Submission of manuscripts**

Authors should submit Word files by using the following e-mail: [conference@ivfggroc.com](mailto:conference@ivfggroc.com) ; [journal@ivfggroc.com](mailto:journal@ivfggroc.com)

### **Important Dates:**

Submission Deadline: August 15, 2024

Notification of Acceptance: 4-8 Weeks

Publication Date: September, 2024

### **Editor-in-Chief**

*Nino Museridze*

### **Managing Editor**

*Tamar Maghularia*

We eagerly await your valuable contributions, which will significantly enrich our journal and the field of reproductive medicine.

### License and permissions

Authors should grant an exclusive license to the MEDICAL TIMES Journal Website. This license allows the website to manage third-party requests to reproduce articles efficiently and consistently and to allow the article to be widely spread. If you are including previously published figures, tables, or text parts, please ensure you have obtained the copyright holder's permission before submission.

Authors may use their own materials in other publications, provided that the Medical Times is acknowledged as the original place of publication and MEDICAL TIMES is notified in writing and in advance.

Format Types		
Research Articles	Review Articles	Short Communications
Title page Author's information Present address Abstract (150 words) Keywords (5-7 Keywords) Introduction Materials and Methods Results Discussion Acknowledgments References Tables Figures <b>An Original Research Article comprises about 3000-6000 words of text, 3-5 figures, and 30-50 references.</b>	Title page Author's information Keywords Present address Abstract Text Acknowledgments References Tables Figures  <b>A Review article should comprises about 4000-8000 words of text, 8-10 figures, and 50-120 references.</b>	Title page Author's information Present address Abstract Keywords Introduction Materials and Methods Results Discussion Acknowledgments References Tables Figures <b>A Communication article should comprise about 2000-3000 words of text, 2-4 figures, and 20-30 references.</b>

Tables	Figures	References
Tables in a document must be numbered with Arabic numerals, and the order should follow how they are cited in the text.  The description titles should be placed at the top of the table, and footnotes should be included below it.  Please note that any data already mentioned in the text cannot be replicated in the tables.  Lastly, tables must be submitted in Microsoft Word and use A4 paper size	Electronic versions of figures must be provided with the following resolutions:  600 dots per inch (dpi) for line drawings and combinations  300 dpi for greyscale and color.  If you include color figures, make sure the files are in CMYK color mode, not RGB.  Also, make sure that the electronic image files print at a readable size and are of high quality for publication.	The references section should be arranged according to the AMA Style.  References should be arranged alphabetically first and then sorted chronologically.  More than one reference from the same author(s) in the same year must be identified by the letters: a, b, c... placed after the year of publication.  Smith, B., Boster, K., 1996. Communication Techniques. Science 2 (2), 413-445.

Article structure		
Introduction	Experimental	Theory/calculation:
In this section, authors should state the objectives of the work and provide a background without giving a detailed literature survey or summary of the results.	The experimental section should provide details to allow the work to be reproduced by an independent researcher. If methods are already published, they should be summarized and referenced. If quoting directly from a previously published method, use quotation marks and also cite the source. Any modifications to existing methods should also be described.	The theory/calculation section should extend, the background to the article already dealt with in the Introduction. It should offer the foundation for further work. This section represents a practical development from a theoretical basis.
Results	Discussion	Conclusions
In this section, authors should present clear and concise results. This is important as it allows readers to quickly understand the main findings of the research without getting lost in unnecessary details.	The discussion section should explore the significance of the results, not repeat them. A combined Results and Discussion section is often appropriate. Citation and discussion of published literature should be avoided.	The conclusions section should present the main conclusions of the study. It should be presented in a short, standalone section. This section can also form a subsection of a Discussion or Results and Discussion section.
Abstract	Acknowledgements	AMA Style
<p>The abstract section is a concise and factual summary of the research. It should state briefly the purpose of the research, the principal results and major conclusions in 150- 250 words.</p> <p>The abstract is the first thing readers will see, so it should be clear, engaging, and accurately represent the research.</p>	The acknowledgements section is a place to recognize and thank those who contributed to the research but do not meet the criteria for authorship. It should be collated in a separate section at the end of the article before the references.	<p>AMA Manual of Style is a style guide of the American Medical Association.</p> <p>All submissions must adhere to the AMA formatting and citation style guidelines.</p>
